Alex STOLARZ, et al.

Appln. No.: 10/784,946

Group Art Unit: 1794

Confirmation No.: 9516

Examiner: Marc A. PATTERSON

Filed: February 25, 2004

For: THERMOPLASTIC MULTILAYER COMPOSITE IN THE FORM OF A HOLLOW BODY

STATEMENT OF SUBSTANCE OF INTERVIEW

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Please review and enter the following remarks summarizing the interview conducted on December 27, 2007:

REMARKS

An Examiner's Interview Summary Record (PTO-413) was attached with the Communication dated December 31, 2007.

During the interview, the following was discussed:

1. Brief description of exhibits or demonstration: Draft of amendment to claim 26
2. Identification of claims discussed: 26, 77, 78 and 81
3. Identification of art discussed: Fepp (6,555,243)
4. Identification of principal proposed amendments: Define the layers with regard to a hollow space.

5. Brief Identification of principal arguments: By adding the hollow space as a reference point, the assembly of layers clearly does not read on the Fepp structure.

6. Indication of other pertinent matters discussed: Filing of RCE to enter claim amendments.

7. Results of Interview: Examiner agreed that the prior art to Fepp is overcome by the amendment.

It is respectfully submitted that the instant STATEMENT OF SUBSTANCE OF INTERVIEW complies with the requirements of 37 C.F.R. §§1.2 and 1.133 and MPEP §713.04.

It is believed that no petition or fee is required. However, if the USPTO deems otherwise, Applicant hereby petitions for any extension of time which may be required to maintain the pendency of this case, and any required fee, except for the Issue Fee, for such extension is to be charged to Deposit Account No. 19-4880.

Respectfully submitted,

/Alan J. Kasper/
